Dear Sir or Madam,

I have a few questions to ask you about Steve Jobs. How Steve Jobs used to manage the company ? How was the company affected by Steve Jobs' cancer fight ? Do you pay homage to Steve Jobs every year ? Here are some questions that I ask myself and I will be happy if you answered.

I also tell myself that you could change a few things in your company now that he has left us. First you should do something for iPhones batteries. One other thing is the bad abilities at playing on Mac, it may be a good idea to improve the GPU. And finally, I think iOS has become a lot of poorly put features, I have to go through the search to find each parameter because I can not understand how you organized them.

I am looking forward to hearing from you.

Sincerely

Anaël Bourgneuf-Monclair

A handwritten signature in black ink, consisting of a large, stylized 'A' followed by a horizontal stroke and a small loop at the end.

I am seeing Steve Jobs as a genius, he started from the bottom, was a simple man but he aride to the top. He inspired people and I thing he still does even from where he is. I personnaly feel inspired by him, as developper I often hope to have as good ideas as he had. He invented so much things like the Mac, the iPhone and a lot of technologies were imaginez by him. I like Apple and there products and I think he did a gréât part on all inventions until he died.
