

My name is Anaël, I am twenty-one. I live in Herouville-Saint-Clair but I come from Saint-Hilaire-du-Harcouet. I have got two younger brothers, one is 19 years old and the other is 14. My parents are quite young, only my mother is 42 and my father is 44. They are not together anymore but my father is still working at my mother's taxi company. I also have a dog named Éole.

I passed my Scientific "Baccalauréat" in 2015, then I went to the college, I studied IT during two years and I think you may know where I am now.

I don't really have hobbies but I played basket-ball during 4 years and I like playing sometimes with friends. I also play some videogames but not really often.

For my future I don't know what I would like to do precisely but I find application and web development quite fine.
